
Point to Point

Large business often purchase point to point links for all their branches. This allows the business to manage their network from a single location. A single large Fibre via Wireless link at head office can be used for connectivity for the whole company.

- Secure,dedicated wireless link for business data.
- You can use a single Fibre via Wireless Internet connection to stream Internet to all other branches.
- Jenny Point to Point is an open connection within the company's network and allows the business user to manage the data stream between offices.
- Various line speeds allows for better link management.
- Quick upgrading of line speeds.
- Easy business expansion.
- Single monthly billing for various branches.
